

STUDENT

Matthew T Banbury

COURSE

Data Wrangling with MongoDB

Code Functionality**Meets Expectations**

- All required exercises in Lesson 6 are solved correctly.

Code Readability**Meets Expectations**

- Your code follows a logical structure.

Problems Encountered in Your Map**Exceeds Expectations**

- Your response shows a very good understanding of the process of auditing data.
- You have implemented additional street name mappings.
- I found your exploration of the zip codes to be very interesting and insightful.

Overview of the Data**Exceeds Expectations**

- You have provided a very good insight into the shape and quality of the data.
- You have used multiple MongoDB queries to explore the data and uncover potential issues with the data.
- Great job for implementing the Tiger GPS changes and exploring how that affects the overall shape of the data.

Other Ideas about the Datasets**Meets Expectations**

- You have provided interesting ideas on how to improve the dataset.
- Great job for discussing the benefits of improving the dataset in the conclusion.

Project is Completely Udacious
